

# Syllabus of JavaScript Training

---

## Introduction

- ✓ What is JavaScript?
- ✓ What Is AJAX?

## Developer Essentials

- ✓ The development workflow
- ✓ Selecting the right tools for the job
- ✓ Just enough HTML and CSS
- ✓ Understanding objects
- ✓ Understanding variables
- ✓ Making comparisons
- ✓ Understanding events

## Starting to Code

- ✓ Writing your first script
- ✓ Internal vs. external scripts
- ✓ Using comments in scripts
- ✓ Using the NoScript tag in HTML

## Interacting with Users

- ✓ Creating alert dialogs
- ✓ Understanding conditional statements
- ✓ Getting confirmations from users
- ✓ Creating prompts for users
- ✓ Understanding functions
- ✓ Making links smarter
- ✓ Using switch/case statements
- ✓ Handling errors

## JavaScript Language Essentials

- ✓ Getting started
- ✓ Creating loops
- ✓ Passing values to functions

- ✓ Detecting objects
- ✓ Reading arrays
- ✓ Returning values from functions
- ✓ Writing arrays
- ✓ Building do and while loops
- ✓ Re-using functions
